SUBJECT INDEX*

A

Acetylcholine

Induction of coronary artery spasm by acetylcholine in patients with variant angina: possible role of the parasympathetic nervous system in the pathogenesis of coronary artery spasm, 955

Action potentials

The monophasic action potential upstroke: a means of characterizing local conduction, 1147

Adenosine

Adenosine-sensitive ventricular tachycardia: evidence suggesting cyclic AMP-mediated triggered activity, 270

Adolescence

Racial (black-white) comparisons of the relationship of levels of endogenous sex hormones to serum lipoproteins during male adolescence: the Bogalusa Heart Study, 1226

Ambulatory monitoring

The use of ambulatory monitoring in the prognostic evaluation of patients with sustained ventricular tachycardia treated with amiodarone, 1054

Amiodarone

Amiodarone versus amiodarone and a type IA agent for treatment of patients with rapid ventricular tachycardia, 1037

Effects of long-term treatment with amiodarone on exercise hemodynamics and left ventricular relaxation in patients with hypertrophic cardiomyopathy, 544

The use of ambulatory monitoring in the prognostic evaluation of patients with sustained ventricular tachycardia treated with amiodarone, 1054

Amrinone

Additive effects of dobutamine and amrinone on myocardial contractility and ventricular performance in patients with severe heart failure, 367

Effect of amrinone on right ventricular function: predominance of afterload reduction, 359

Amyl nitrite

T. Lauder Brunton and amyl nitrite: a Victorian vasodilator, 222

Anesthesia

Perioperative hypertension in patients undergoing carotid endarterectomy: shorter duration under regional block anesthesia, I-1

Angina

Altered left ventricular diastolic properties during pacing-induced angina in patients with aortic stenosis, 675

Coronary angioplasty for early postinfarction unstable angina, 1365

Effects of propranolol and nifedipine on exercise-induced attack in patients with variant angina: assessment by exercise thallium-201 myocardial scintigraphy with quantitative rotational tomography, 374

Histologic evidence for small-vessel coronary artery disease in patients with angina pectoris and patent large coronary arteries, 964

Increased uptake of ¹⁸F-fluorodeoxyglucose in postischemic myocardium of patients with exercise-induced angina, 81

Local coronary supersensitivity to diverse vasoconstrictive stimuli in patients with variant angina, 1255

Preliminary experience with synchronized coronary sinus retroperfusion in humans, 381

Provocation of coronary spasm by dopamine in patients with active variant angina pectoris, 262

Resting angina with fixed coronary artery stenosis: nocturnal decline in ischemic threshold, 1248

Ten year survival after coronary artery bypass surgery for angina in patients aged 65 years and older, 509

Angioplasty

Changes in systemic vascular resistance detected by the arterial resistometer: preliminary report of a new method tested during percutaneous transluminal coronary angioplasty, 780

Coronary angioplasty for early postinfarction unstable angina, 1365

Coronary dissection and total coronary occlusion associated with percutaneous transluminal coronary angioplasty: significance of initial angiographic morphology of coronary stenosis, 1371

Early results of emergency surgery after coronary angioplasty, III-26

Prediction of long-term clinical outcome with final transluminal pressure gradient during coronary angioplasty, 563

Prevention of ischemia during percutaneous transluminal coronary angioplasty by transcatheter infusion of oxygenated Fluosol DA 20%, 555

Synthetic patch angioplasty for repair of coarctation of the aorta: experience with aneurysm formation, I-32

Value of intracoronary electrocardiogram to monitor myocardial ischemia during percutaneous transluminal coronary angioplasty, 330

Antioxidants

Influence of antioxidants (mannitol and allopurinol) on oxygen free radical generation during and after cardiopulmonary bypass, III-134

Aortic aneurysm

Late rupture after Dacron wrapping of aortic aneurysms, I-11

Synthetic patch angioplasty for repair of coarctation of the aorta: experience with aneurysm formation, I-32

Aortic disease

Extended aortic arch anastomosis for repair of coarctation in infancy, I-37

Surgery for coarctation of the aorta in the neonate, I-25

Aortic insufficiency

Aortic valve insufficiency due to aortic dilatation: correction by sinus rim adjustment, I-136

Aortic stenosis

Altered left ventricular diastolic properties during pacing-induced angina in patients with aortic stenosis, 675

Aortic valvuloplasty for acquired aortic stenosis, I-130

Balloon dilatation of calcific aortic stenosis in elderly patients: post-mortem, intraoperative, and percutaneous valvuloplasty studies, 119

Flow in the aorta and patent ductus arteriosus in infants with aortic atresia or aortic stenosis: a pulsed Doppler ultrasound study, 315

Arrhythmia

Ablation of cardiac tissues by an electrode catheter technique for treatment of ectopic supraventricular tachycardia in adults, 1044

Amiodarone versus amiodarone and a type IA agent for treatment of patients with rapid ventricular tachycardia, 1037

The effect of chemical ablation of the endocardium on ventricular fibrillation threshold, 645

The effects of doxorubicin on ventricular tachycardia, 881

Effects of incremental doses of procainamide on ventricular refractoriness, intraventricular conduction, and induction of ventricular tachycardia, 1355

Endocardial catheter mapping: wire skeleton technique for representation of computed arrhythmogenic sites compared with intraoperative mapping, 1346

High-frequency analysis of the surface electrocardiograms of patients with supraventricular tachycardia: accurate identification of atrial activation and determination of the mechanism of tachycardia, 1016

The implantable transvenous cardioverter: long-term efficacy and reproducible induction of ventricular tachycardia, 518

Modulated parasystole originating in the sinoatrial node, 945

The preexcitation index: an aid in determining the mechanism of supraventricular tachycardia and localizing accessory pathways, 493

Prognostic significance of ventricular tachycardia and fibrillation induced at programmed stimulation and delayed potentials detected on the signal-averaged electrocardiograms of survivors of acute myocardial infarction, 731

Resetting response patterns during sustained ventricular tachycardia: relationship to the excitable gap, 722

Simultaneous recording of action potentials from endocardium and epicardium during ischemia in the isolated cat ventricle: relation of temporal electrophysiologic heterogeneities to arrhythmias, 401

Treatment of ventricular arrhythmias after myocardial infarction, 653

Arrhythmogenicity

Histologic changes and arrhythmogenicity after discharge through transseptal catheter electrode, 637

Arterial wall

Intimal plus medial thickness of the arterial wall: a direct measurement with ultrasound imaging, 1399

*Roman numbers indicate articles published in supplements.

Aspirin

Beneficial effect of aspirin in maintaining the patency of small-caliber prosthetic grafts after thrombolysis with urokinase or tissue-type plasminogen activator, I-21

Atherosclerosis

The use of frequency histograms of ultrasonic backscatter amplitudes for detection of atherosclerosis in vitro, 1093

Atrial flutter

Pharmacologic conversion and suppression of experimental canine atrial flutter: differing effects of *d*-sotalol, quinidine, and lidocaine and significance of changes in refractoriness and conduction, 197

Atrial tissue

Myosin isoenzyme distribution in overloaded human atrial tissue, 477

Atrioventricular canal

Prognostic factors and surgical treatment of partial atrioventricular canal, I-42

B

β -Adrenergic receptors

Assessment of the β -adrenergic receptor pathway in the intact failing human heart: progressive receptor down-regulation and subsensitivity to agonist response, 1290

Blacks

Blacks in the Coronary Artery Surgery Study: risk factors and coronary artery disease, 64

β -Blockade

Effects of selective and nonselective β -adrenergic blockade on mechanisms of exercise conditioning, 664

Hemodynamic-inotropic response to a β -blocker with intrinsic sympathomimetic activity in patients with congestive cardiomyopathy, 1390

The renal, forearm, and hormonal responses to standing in the presence and absence of propranolol, 1061

Blood flow

Arterial-venous relationships in the human left ventricular myocardium: anatomic basis for countercurrent regulation of blood flow, 1195

Comparison of multiple views for the evaluation of pulmonary arterial blood flow by Doppler echocardiography, 1002

Comparison of perioperative and postoperative phasic blood flow in aortocoronary venous bypass grafts by means of pulsed Doppler echocardiography with implantable microprobes, III-61

Effect of coronary stenotic lesions on regional myocardial blood flow at rest, 746

Evaluation of human coronary blood flow with an 80 channel, 20 MHz pulsed Doppler velocimeter and zero-cross and Fourier transform methods during cardiac surgery, III-53

Failure to augment maximal limb blood flow in response to one-leg versus two-leg exercise in patients with severe heart failure, 245

The immediate effects of iohexol on coronary blood flow and myocardial function in vivo, 1416

Interrelationship of mid-diastolic mitral valve motion, pulmonary venous flow, and transmittal flow, 36

Noninvasive evaluation of left ventricular performance based on peak aortic blood acceleration measured with a continuous-wave Doppler velocity meter, 323

Phasic mitral blood flow and regional left ventricular dimensions: possible mechanism of active assist to ventricular filling, 901

Regional myocardial volume perfused by the coronary artery branch: estimation in vivo, 157

Selective enhancement of function of stunned myocardium by increased flow, 843

Sympathetic reflex control of skeletal muscle blood flow in patients with congestive heart failure: evidence for β -adrenergic circulatory control, 929

Blood viscosity

Effect of a reduction in blood viscosity on maximal myocardial oxygen delivery distal to a moderate coronary stenosis, 1085

Body surface mapping

Characterization of the spatial distribution of late ventricular potentials by body surface mapping in patients with ventricular tachycardia, 1323

Mapping of the body surface potential in patients with the idiopathic long QT syndrome, 1334

The role of initial minimum potentials on body surface maps in predicting the site of accessory pathways in patients with Wolff-Parkinson-White syndrome, 89

Brunton, T. Lauder

T. Lauder Brunton and amyl nitrite: a Victorian vasodilator, 222

C

Calcitonin gene-related peptide

Calcitonin gene-related peptide: a potent dilator of human epicardial coronary arteries, 1243

Calcium antagonists

Comparative effects of nicardipine, a new calcium antagonist, on size of myocardial infarction after coronary artery occlusion in dogs, 420

Frequency-dependent effects of calcium antagonists on atrioventricular conduction and refractoriness: demonstration and characterization in anesthetized dogs, 1156

Cardiac arrest

Arteriovenous carbon dioxide and pH gradients during cardiac arrest, 1071

Vest inflation without simultaneous ventilation during cardiac arrest in dogs: improved survival from prolonged cardiopulmonary resuscitation, 1407

Cardiac conduction

Evolution of a hereditary cardiac conduction and muscle disorder: a study involving a family with six generations affected, 21

Pharmacologic conversion and suppression of experimental canine atrial flutter: differing effects of *d*-sotalol, quinidine, and lidocaine and significance of changes in refractoriness and conduction, 197

Use-dependent effects of lidocaine on conduction in canine myocardium: application of the modulated receptor hypothesis in vivo, 205

Cardiac output

Maintenance of cardiac output with normal filling pressures in patients with dilated heart failure, 1303

Cardiac tamponade

The shift in the relationship between intrapericardial fluid pressure and volume induced by acute left ventricular pressure overload during cardiac tamponade, 173

Cardiac transplantation

Cardiac transplantation, 913

Early function of cardiac homografts: relationship to hemodynamics in the donor and length of the ischemic period, III-77

Magnetic resonance imaging of cardiac transplants: the evaluation of rejection of cardiac allografts with and without immunosuppression, 145

Noninvasive monitoring of cardiac allograft rejection by intramyocardial electrogram recordings, III-72

Preservation of donor heart function and high-energy stores by continuous perfusion with synthetic plasma at 22° C, III-80

Reversal of cardiac transplant rejection without massive immunosuppression, III-68

Cardiogenic shock

Surgical treatment of cardiogenic shock after myocardial infarction, III-11

Cardiomyopathy

The differential effects of positive inotropic and vasodilator therapy on diastolic properties in patients with congestive cardiomyopathy, 815

Evolution of a hereditary cardiac conduction and muscle disorder: a study involving a family with six generations affected, 21

Hemodynamic-inotropic response to a β -blocker with intrinsic sympathomimetic activity in patients with congestive cardiomyopathy, 1390

Time variation of mitral regurgitant flow in patients with dilated cardiomyopathy, 684

Cardioplegia

The efficacy of blood versus crystalloid sinus cardioplegia during global myocardial ischemia, III-99

Enhancement of cardioplegic protection with the free-radical scavenger peroxidase, III-138

- Late postoperative ventricular function after blood and crystalloid cardioplegia, III-89
- Regional myocardial protection by retrograde coronary sinus infusion of cardioplegic solution, III-16
- Retrograde coronary sinus versus aortic root perfusion with cold cardioplegia: a randomized study of levels of cardiac enzymes in 40 patients, III-105
- Cardiopulmonary bypass**
- Influence of antioxidants (mannitol and allopurinol) on oxygen free radical generation during and after cardiopulmonary bypass, III-134
- Oxygen free radical generation during cardiopulmonary bypass: correlation with complement activation, III-130
- Platelet size and mass as an indicator for platelet transfusion after cardiopulmonary bypass, III-153
- Cardiopulmonary resuscitation**
- Absence of improvement in resuscitation from ventricular fibrillation by sodium bicarbonate in dogs, IV-75
- Acute myocardial infarction: state of the art, IV-120
- Advanced pediatric life support: state of the art, IV-124
- Alternative approaches to external chest compression, IV-98
- Alternative methods of ventilation during respiratory and cardiac arrest, IV-63
- Arteriovenous carbon dioxide and pH gradients during cardiac arrest, 1071
- Calcium-channel blockers and advanced cardiac life support, IV-94
- Calcium: limited indications, some danger, IV-90
- Cardiopulmonary resuscitation: beyond cardiac massage, 443
- Cardiopulmonary resuscitation and hypothermia, IV-29
- Cardiopulmonary resuscitation with interposed abdominal compression, IV-37
- Cardiovascular pharmacology I, IV-70
- Cardiovascular pharmacology II: the use of catecholamines, pressor agents, digitalis, and corticosteroids in CPR and emergency cardiac care, IV-80
- Cardiovascular pharmacology III: atropine, calcium, calcium blockers, and β -blockers, IV-86
- Cerebral resuscitation after cardiac arrest: a review, IV-138
- Continuous external counterpressure during closed-chest resuscitation: a critical appraisal of the military antishock trouser garment and abdominal binder, IV-102
- Defibrillation performed by the emergency medical technician, IV-9
- Education and evaluation in emergency cardiac care programs (CPR and advanced cardiac life support): state of the art, IV-18
- Electrical therapy for cardiovascular emergencies, IV-111
- Emergency medical service systems in acute cardiac care: state of the art, IV-4
- Energy requirements for defibrillation, IV-117
- External compression without adjuncts, IV-33
- Foreign body airway obstruction: considerations in 1985, IV-60
- The influence of manual chest compression rate on hemodynamic support during cardiac arrest: high-impulse cardiopulmonary resuscitation, IV-51
- Management of paroxysmal supraventricular tachycardia, IV-108
- Modifications of cardiopulmonary resuscitation based on the cough, IV-42
- Near drowning, IV-27
- A needs assessment of advanced life support and emergency medical services in the pediatric patient: state of the art, IV-129
- The role of the esophageal obturator airway in cardiopulmonary resuscitation, IV-134
- Special considerations for defibrillation performed by emergency medical technicians in small communities, IV-13
- Special resuscitation situations: near drowning, traumatic injury, electric shock, and hypothermia, IV-23
- Standards and guidelines for cardiopulmonary resuscitation and emergency cardiac care, IV-1
- Teaching and credentialing the physically challenged: state of the art. A review of change in the clinical and scientific data since 1980, IV-66
- Vest inflation without simultaneous ventilation during cardiac arrest in dogs: improved survival from prolonged cardiopulmonary resuscitation, 1407
- Cardioversion**
- The implantable transvenous cardioverter: long-term efficacy and reproducible induction of ventricular tachycardia, 518
- Catecholamines**
- Characteristics of initiation and termination of catecholamine-induced triggered activity in atrial fibers of the coronary sinus, 1168
- Catheter ablation**
- Ablation of cardiac tissues by an electrode catheter technique for treatment of ectopic supraventricular tachycardia in adults, 1044
- Chemical ablation**
- The effect of chemical ablation of the endocardium on ventricular fibrillation threshold, 645
- Cholesterol**
- High-density lipoprotein cholesterol and coronary heart disease in hypercholesterolemic men: The Lipid Research Clinics Coronary Primary Prevention Trial, 1217
- Histamine-induced coronary spasm in regions of intimal thickening in miniature pigs: roles of serum cholesterol and spontaneous or induced intimal thickening, 826
- Regulation of plasma levels of low-density lipoprotein cholesterol: interpretation of data on low-density lipoprotein turnover in man, 805
- Chordae tendineae**
- The effect of preservation of chordae tendineae in mitral valve replacement for postinfarction mitral regurgitation, I-116
- Clinical trials**
- Beyond randomized clinical trials: applying clinical experience in the treatment of patients with coronary artery disease, 1191
- Optimal detection of the progression of coronary artery disease: comparison of methods suitable for risk factor intervention trials, 1235
- Coarctation**
- Extended aortic arch anastomosis for repair of coarctation in infancy, I-37
- Surgery for coarctation of the aorta in the neonate, I-25
- Synthetic patch angioplasty for repair of coarctation of the aorta: experience with aneurysm formation, I-32
- Collateral circulation**
- Limitation of myocardial ischemia by collateral circulation during sudden controlled coronary artery occlusion: a prospective study, 469
- Complement activation**
- Oxygen free radical generation during cardiopulmonary bypass: correlation with complement activation, III-130
- Conduction**
- Effect of postganglionic vagal stimulation on the organization of atrioventricular nodal conduction in isolated rabbit heart tissue, 869
- Effects of incremental doses of procainamide on ventricular refractoriness, intraventricular conduction, and induction of ventricular tachycardia, 1355
- The effects of procainamide on conduction in anisotropic canine ventricular myocardium, 616

Septal geometry in the unloaded living human heart, 463

Sex hormones

Racial (black-white) comparisons of the relationship of levels of endogenous sex hormones to serum lipoproteins during male adolescence: the Bogalusa Heart Study, 1226

Sinoatrial node

Modulated parasympathetic originating in the sinoatrial node, 945

d-Sotalol

Pharmacologic conversion and suppression of experimental canine atrial flutter: differing effects of d-sotalol, quinidine, and lidocaine and significance of changes in refractoriness and conduction, 197

Special reports

Guidelines for clinical use of cardiac radionuclide imaging, December 1986, 1468A

Guidelines for exercise testing, 653A

Recommendations for use of laboratory studies for pediatric patients with suspected or proven heart disease, 443A

Recreational and occupational recommendations for young patients with heart disease, 1195A

Report of WHO/ISFC Task Force on Nomenclature of Coronary Arteriograms, 451A

Stenosis

Coronary dissection and total coronary occlusion associated with percutaneous transluminal coronary angioplasty: significance of initial angiographic morphology of coronary stenosis, 1371

Streptokinase

Assessment of fibrin degradation products during fibrinolytic therapy for acute myocardial infarction, 1027

Which patients benefit most from early thrombolytic therapy with intracoronary streptokinase? 1379

Stunned myocardium

Selective enhancement of function of stunned myocardium by increased flow, 843

Subendocardial infarction

The subendocardial border zone during acute ischemia of the rabbit heart: an electrophysiologic, metabolic, and morphologic correlative study, 1137

Superoxide dismutase

Reduction in experimental infarct size by recombinant human superoxide dismutase: insights into the pathophysiology of reperfusion injury, 1424

Supraventricular tachycardia

Ablation of cardiac tissues by an electrode catheter technique for treatment of ectopic supraventricular tachycardia in adults, 1044

High-frequency analysis of the surface electrocardiograms of patients with supraventricular tachycardia: accurate identification of atrial activation and determination of the mechanism of tachycardia, 1016

The preexcitation index: an aid in determining the mechanism of supraventricular tachycardia and localizing accessory pathways, 493

Surgery

Early results of emergency surgery after coronary angioplasty, III-26

The efficacy of blood versus crystalloid sinus cardioplegia during global myocardial ischemia, III-99

Evaluation of human coronary blood flow with an 80 channel, 20 MHz pulsed Doppler velocimeter and zero-cross and Fourier transform methods during cardiac surgery, III-53

The influence of surgery on the natural history of angiographically documented left ventricular aneurysm: the Coronary Artery Surgery Study, 110

Late postoperative ventricular function after blood and crystalloid cardioplegia, III-89

Long-term results in surgical treatment of children 4 years old or younger with coronary involvement due to Kawasaki disease, I-77

Regional myocardial protection by retrograde coronary sinus infusion of cardioplegic solution, III-16

Retrograde coronary sinus versus aortic root perfusion with cold cardioplegia: a randomized study of levels of cardiac enzymes in 40 patients, III-105

Surgery for Wolff-Parkinson-White syndrome: further experience with an epicardial approach, 525

Survival

Ten year survival after coronary artery bypass surgery for angina in patients aged 65 years and older, 509

Systemic vascular resistance

Systemic vascular resistance: an unreliable index of left ventricular afterload, 1114

T**Taussig-Bing heart**

Intraventricular tunnel repair for Taussig-Bing heart and related cardiac anomalies, I-53

Thromboembolism

Antithrombotic therapy for acute myocardial infarction: mechanisms and prevention of deep venous, left ventricular, and coronary artery thromboembolism, III-1

Thrombolysis

Beneficial effect of aspirin in maintaining the patency of small-caliber prosthetic grafts after thrombolysis with urokinase or tissue-type plasminogen activator, I-21

Coronary thrombolysis with recombinant single-chain urokinase-type plasminogen activator in patients with acute myocardial infarction, 1066

Enhancement of thrombolysis with tissue-type plasminogen activator by pretreatment with heparin, 583

Synergism of thrombolytic agents in vivo, 838

Thrombolysis with recombinant human tissue-type plasminogen activator in patients with peripheral artery and bypass graft occlusions, I-15

Which patients benefit most from early thrombolytic therapy with intracoronary streptokinase? 1379

Thromboxane

Prevention of myocardial platelet deposition and thromboxane release with dipyridamole, III-145

Tissue characterization

Sensitive detection of the effects of reperfusion on myocardium by ultrasonic tissue characterization with integrated backscatter, 389

Tissue-type plasminogen activator

Beneficial effect of aspirin in maintaining the patency of small-caliber prosthetic grafts after thrombolysis with urokinase or tissue-type plasminogen activator, I-21

Enhancement of thrombolysis with tissue-type plasminogen activator by pretreatment with heparin, 583

Synergism of thrombolytic agents in vivo, 838

Thrombolysis with recombinant human tissue-type plasminogen activator in patients with peripheral artery and bypass graft occlusions, I-15

Tomography

Precision measurements of right and left ventricular volume by cine computed tomography, 890

Quantification of myocardial infarct size by thallium-201 single-photon emission computed tomography: experimental validation in the dog, 852

Transposition of the great arteries

Up to 7 years of follow-up after two-stage anatomic correction of simple transposition of the great arteries, I-47

Transseptal electrode

Histologic changes and arrhythmogenicity after discharge through transseptal catheter electrode, 637

Tricuspid atresia

Left ventricular wall stress and contractile function in childhood: normal values and comparison of Fontan versus palliation only in patients with tricuspid atresia, 1-61

Triggered activity

Characteristics of initiation and termination of catecholamine-induced triggered activity in atrial fibers of the coronary sinus, 1168

U

Ultrasonic backscatter

The use of frequency histograms of ultrasonic backscatter amplitudes for detection of atherosclerosis in vitro, 1093

Ultrasound

Intimal plus medial thickness of the arterial wall: a direct measurement with ultrasound imaging, 1399

Urokinase

Beneficial effect of aspirin in maintaining the patency of small-caliber prosthetic grafts after thrombolysis with urokinase or tissue-type plasminogen activator, 1-21

Synergism of thrombolytic agents in vivo, 838

Urokinase-type plasminogen activator

Coronary thrombolysis with recombinant single-chain urokinase-type plasminogen activator in patients with acute myocardial infarction, 1066

V

Vagal stimulation

Effect of postganglionic vagal stimulation on the organization of atrioventricular nodal conduction in isolated rabbit heart tissue, 869

Valve replacement

Five year follow-up after valve replacement with the St. Jude Medical valve in infants and children, 1-110

Hemodynamic predictors of outcome in patients undergoing valve replacement, 1309

Papillary-annular continuity and left ventricular systolic function after mitral valve replacement, 1-121

The effect of preservation of chordae tendineae in mitral valve replacement for postinfarction mitral regurgitation, 1-116

Valvular heart disease

Mechanics of postextrasystolic potentiation in normal subjects and patients with valvular heart disease, 10

Validation of continuous-wave Doppler echocardiographic measurements of mitral and tricuspid prosthetic valve gradients: a simultaneous Doppler-catheter study, 786

Valvular regurgitation

Intraoperative echocardiography for the evaluation of valvular regurgitation: experience in 263 patients, 1-143

Valvuloplasty

Aortic valvuloplasty for acquired aortic stenosis, 1-130

Balloon dilatation of calcific aortic stenosis in elderly patients: post-mortem, intraoperative, and percutaneous valvuloplasty studies, 119

Variant angina

Induction of coronary artery spasm by acetylcholine in patients with variant angina: possible role of the parasympathetic nervous system in the pathogenesis of coronary artery spasm, 955

Vascular resistance

Changes in systemic vascular resistance detected by the arterial resistometer: preliminary report of a new method tested during percutaneous transluminal coronary angioplasty, 780

Vasoconstriction

Local coronary supersensitivity to diverse vasoconstrictive stimuli in patients with variant angina, 1255

Vasodilation

Vasodilatory behavior of skeletal muscle arterioles in patients with nonedematous chronic heart failure, 775

Vasodilators

The differential effects of positive inotropic and vasodilator therapy on diastolic properties in patients with congestive cardiomyopathy, 815

Vasomotor tone

Calcitonin gene-related peptide: a potent dilator of human epicardial coronary arteries, 1243

Ventricular aneurysm

The influence of surgery on the natural history of angiographically documented left ventricular aneurysm: the Coronary Artery Surgery Study, 110

Ventricular coupling

Ventricular coupling in constrictive pericarditis, 597

Ventricular function

Additive effects of dobutamine and amrinone on myocardial contractility and ventricular performance in patients with severe heart failure, 367

Advantages and applications of the centerline method for characterizing regional ventricular function, 293

Altered left ventricular diastolic properties during pacing-induced angina in patients with aortic stenosis, 675

Assessment of the end-systolic pressure-volume relationship in human beings with the use of a time-varying elastance model, 97

Effect of amrinone on right ventricular function: predominance of afterload reduction, 359

Effects of nifedipine on intrinsic myocardial stiffness in man, 126

The effect of vasoactive agents on the left ventricular end-systolic pressure-volume relation in closed-chest dogs, 1107

The effects of pressure-induced right ventricular hypertrophy on left ventricular diastolic properties and dynamic geometry in the conscious dog, 410

Improvement of left ventricular contractile function by exercise training in patients with coronary artery disease, 350

The influence of preload and heart rate on Doppler echocardiographic indexes of left ventricular performance: comparison with invasive indexes in an experimental preparation, 181

Left ventricular filling dynamics: influence of left ventricular relaxation and left atrial pressure, 187

Left ventricular wall stress and contractile function in childhood: normal values and comparison of Fontan versus palliation only in patients with tricuspid atresia, 1-61

Measurement of regional wall motion from biplane contrast ventriculograms: a comparison of the 30 degree right anterior oblique and 60 degree left anterior oblique projections in patients with acute myocardial infarction, 796

Mechanisms of remote myocardial dysfunction during coronary artery occlusion in the presence of multivessel disease, 588

Myocardial relaxation and passive diastolic properties in man, 991

Noninvasive evaluation of left ventricular performance based on peak aortic blood acceleration measured with a continuous-wave Doppler velocity meter, 323

Papillary-annular continuity and left ventricular systolic function after mitral valve replacement, 1-121

Phasic mitral blood flow and regional left ventricular dimensions: possible mechanism of active assist to ventricular filling, 901

Precision measurements of right and left ventricular volume by cine computed tomography, 890

Septal geometry in the unloaded living human heart, 463

Systemic vascular resistance: an unreliable index of left ventricular afterload, 1114

Ventricular hypertrophy

The effects of pressure-induced right ventricular hypertrophy on left ventricular diastolic properties and dynamic geometry in the conscious dog, 410

Ventricular interaction

Paradoxical and pseudoparadoxical interventricular septal motion in patients with right ventricular volume overload, 230

Ventricular remodeling

Left ventricular remodeling after myocardial infarction: a corollary to infarct expansion, 693

Ventricular sensory receptor

Impaired responsiveness of the ventricular sensory receptor in hypertensive patients with left ventricular hypertrophy, 980

Ventricular septal defect

Color Doppler detection of multiple ventricular septal defects, 1317

Ventricular septal rupture

Postinfarction ventricular septal rupture: the importance of location of infarction and right ventricular function in determining survival, 45

Ventricular tachycardia

Adenosine-sensitive ventricular tachycardia: evidence suggesting cyclic AMP-mediated triggered activity, 270

Amiodarone versus amiodarone and a type IA agent for treatment of patients with rapid ventricular tachycardia, 1037

Characterization of the spatial distribution of late ventricular potentials by body surface mapping in patients with ventricular tachycardia, 1323

The effects of doxorubicin on ventricular tachycardia, 881

Effects of incremental doses of procainamide on ventricular refractoriness, intraventricular conduction, and induction of ventricular tachycardia, 1355

The implantable transvenous cardioverter: long-term efficacy and reproducible induction of ventricular tachycardia, 518

Polymorphous ventricular tachycardia: clinical characterization, therapy, and the QT interval, 340

Quantitative analysis of myocardial infarct structure in patients with ventricular tachycardia, 1266

Resetting response patterns during sustained ventricular tachycardia: relationship to the excitable gap, 722

The use of ambulatory monitoring in the prognostic evaluation of patients with sustained ventricular tachycardia treated with amiodarone, 1054

Ventricular/vascular interaction

Ventricular/vascular interaction in patients with mild systemic hypertension and normal peripheral resistance, 455

Ventriculography

Measurement of regional wall motion from biplane contrast ventriculograms: a comparison of the 30 degree right anterior oblique and 60 degree left anterior oblique projections in patients with acute myocardial infarction, 796

Verapamil

Acute spinal cord ischemia: prevention of paraplegia with verapamil, 1-5

Does verapamil improve left ventricular relaxation in patients with myocardial hypertrophy? 530

Volume overload

Paradoxical and pseudoparadoxical interventricular septal motion in patients with right ventricular volume overload, 230

W**Wall thickening**

Direct measurement of inner and outer wall thickening dynamics with epicardial echocardiography, 164

Wolff-Parkinson-White syndrome

The role of initial minimum potentials on body surface maps in predicting the site of accessory pathways in patients with Wolff-Parkinson-White syndrome, 89

Surgery for Wolff-Parkinson-White syndrome: further experience with an epicardial approach, 525
